Short presentation

My research field is sociolinguistics in a broad sense. I work with many different approaches and methods, quantitative as well as qualitative. At the moment my research includes the following:

Language change

Language ideology

Phonetic variation in Danish

Dialect and globalization

Linguistic commodification

Language and authenticity

Language, gender & sexuality

Language and nation

Language and coloniality in Greenland

I supervise projects and theses within sociolinguistics and related fields.

Impact

At the Faculty of Humanities my research is used as an example of the impact the humanities researchers have on society.

Read the case: Spoken language is a dynamic entity.

Education

2007 PhD in sociolinguistics, UCPH
2000 MA in Danish (and Mathematics, BA), KU

Employment

2015- Director of the LANCHART Centre, UCPH
